

# THINGS TO KNOW

## FOSTERING

When you begin fostering for SRR we ask you to keep all of the information that we have emailed in a safe place on your computer, so that you can refer back to it when needed.

## VETTING

The majority of SRR animals are pre vetted before leaving for their foster, however, if they are not, and eg a mum and babies, we wait until they are the appropriate age to be vetted and either the foster carer drives them to one of our approved vets (FUEL IS PAID), or we organise transport and vetting and return your foster pet to your door.

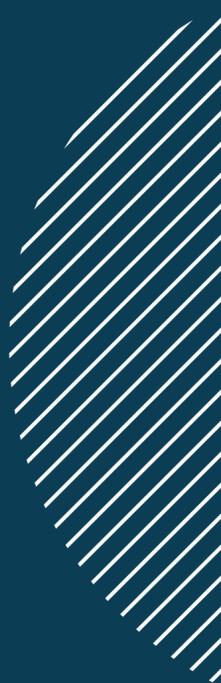

If you are willing to drive an unvetted pet to the vet, Katrina is the person who will organise an appointment, around a time that suits you and your lifestyle.

For emergencies SRR has the following vets approved:

**All Animal Vet Nambour 07 5441 2355**

**Clontarf Vet 3284 4262**

**Sunshine Beach Vet (07) 5447 4569**

Soquilichi Rescue Ranch

## ANIMALS DIET

At SRR I myself feed my felines boiled chicken and rice a few nights a week and I alternate with fresh mince and chicken necks, and dried food always on hand. We may use tin food once a week, but I am a firm believer in it making their poop less than desirable !

I always have fresh water available and I use colloidal silver in all of my pets water (We can provide this).

If we ever have any animals that are unwell I use slippery elm, protexin and or anything that helps line their guts again. (We can also provide this).

Sadly many deathrow animals have a compromised immune system, courtesy of the pound.

## DONATIONS

SRR always has goods donated to us. If you require something, never be afraid to ask!

We also recommend every single foster carer to take up the opportunity to utilise a donation wheelie bin in their local area. We provide the wheelie bin, the sticker and the email to the company. If you can find somewhere to accept it, we will get the ball rolling and all of the goods donated become yours!

## FLEA & WORMING

We flea our animals monthly and worm every 3 months. As soon as you require these products, please email or FB SRR and these items will be provided to your mailbox.

## PROFILE of your pet

We ask our foster carers to get to know their pet and when they are comfortable, provide a profile for the public to be able to peruse.

Name - Breed - Colour - Age - Gender -  
Desexed - Yes Vaccinated - Yes Vet  
Checked - Yes Microchipped - Yes Good  
with Cats - Good with Dogs - Good with  
Children - Personality

## PHOTOGRPAHY

We are happy for foster carers to take as many photos as possible and share them freely on FB and social media. You would be surprised how many people find their pet simply from seeing a photograph on FB.

We also book a professional photographer for your pet and this occurs when you and your pet have a suitable day and time free. The amazing Katrina will contact you to arrange a suitable time.
